

放到獨立的檔案

```
import { scrollOverNinetyPercent } from '...';

const scroll$ = Observable
    .fromEvent(scrollView, 'scroll');

scroll$
    .let(scrollOverNinetyPercent)
    .exhaustMap(() => fetch('url...'))
    .subscribe(res => {
        // do something change view
    });
```

抽離 observable creator

```
import { scrollOverNinetyPercent } from '...';

const scroll$ = Observable
    .fromEvent(scrollView, 'scroll');

scroll$
    .let(scrollOverNinetyPercent)
    .exhaustMap(() => fetch('url...'))
    .subscribe(res => {
        // do something change view
    });
```
