

方駿至獨立自給當寒來

```
import { retry, catchError } from 'rxjs/operators';
      onErrorReturn

const defaultData = { success: false, data: [] };

const getPostObservable = () =>
  Observable.ajax('url...')
    .pipe(
      retry(3),
      onErrorReturn(defaultData)
    );
```

```
import {onErrorReturn} from '...';
```

放到獨立的檔案

```
import { retry, catchError } from 'rxjs/operators';
import { onErrorReturn } from '...';

const defaultData = { success: false, data: [] };

const getPostObservable = () =>
  Observable.ajax('url...')
    .pipe(
      retry(3),
      onErrorReturn(defaultData)
    );
```

盡可能使用 Observable
