Array

```
const defaultData = { success: false, data: [] };
```

```
const getPostObservable = () =>  
  Observable.ajax('url...')  
    .retry(3)  
    .catch(() => [defaultData]);
```

回傳 **Array**

```
const defaultData = { success: false, data: [] };

const getPostObservable = () =>
  Observable.ajax('url...')
    .retry(3)
    .catch(() => [defaultData]);
```

```
import { retry, catchError } from 'rxjs/operators';

const defaultData = { success: false, data: [] };

const getPostObservable = () =>
  Observable.ajax('url...')
    .pipe(
      retry(3),
      catchError(() => [defaultData])
    );
```
