

src011View.addEventListener('src011', event => {

let isRequesting = false;

const DOM = event.target;

//do something change view

```
if(hasScrolled(DOM) > 0.9 && !isRequesting) {
```

isRequesting == false;

isRequesting == true;

.then(res => {

fetch(url...)

若 is Requesting 為 false

再發送 Request

發送Request前，

設定 is Request 為 true

isRequesting == true;

fetch(url);
