

```
var mouseMove = Observable  
    .fromEvent(DOM, 'mousemove');
```

observable 建立與訂閱

```
var subscription = mouseMove  
    .subscribe(x => console.log(x));
```

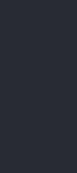

subscription.unsubscribe();

observable 建立與訂閱

```
var mouseMove = Observable
    .fromEvent(DOM, 'mousemove');

var subscription = mouseMove
    .subscribe(x => console.log(x));

subscription.unsubscribe();
```

建立 observable

```
Observable.of(2, 3, 4);
```
