

Observable.off(2,3,4);

Observable.from([2, 3, 4]);

Observable.from(fetch('url'));

Observable.ajax('url');

Observable.fromEvent(DOM, 'click');

Observable.interval(1000);

建立observable

建立 observable

```
Observable.of(2, 3, 4);
```

```
Observable.from([2, 3, 4]);
```

```
Observable.from(fetch('url'));
```

```
Observable.ajax('url');
```

```
Observable.fromEvent(DOM, 'click');
```

```
Observable.interval(1000);
```

```
var sub = Observable
    .from([1, 2, 3])
    .map(x => x + 1)
    .filter(x => x % 2 === 0)
    .subscribe({
        next: x => console.log(x),
        error: err => {},
        complete: () => {},
    });
```
