

operator

Observable 的方法

可對元素作運算處理

永遠回傳-一個新的

observable (有例外)

observer

用來訂閱 observable 的

next 函式一定要有

error 與 complete 可選

```
next: x => console.log(x),
```

```
.filter(x \Rightarrow x \% 2 == 0)
```

Observable SUD var

complete: ()

```
error: err => {},
```

```
map(x \Rightarrow x + 1)
```

.subscribe({

3]) .from([1, 2,

```
next: x \Rightarrow console.log(x),
```

```
.filter(x \Rightarrow x % 2 === 0)
```

complete: $() \Rightarrow \{\},$

error: err ⇒ {},

```
.map(x \Rightarrow x + 1)
```

.subscribe({
