```javascript
Observable.fromEvent(scrollView, 'scroll')
    .map(event => event.target)
    .map(hasScrolled)
    .filter(p => p > 0.9)
    .exhaustMap(() => fetch('url...'))
    .take(3)
    .subscribe(res => {
        // do something change view
    });
```
