```javascript
const scroll$ = Observable
                .fromEvent(scrollView, 'scroll');

scroll$
  .map(event => event.target)
  .map(hasScrolled)
  .filter(p => p > 0.9)
  .exhaustMap(() => fetch('url...'))
  .subscribe(res => {
    // do something change view
  });
```

抽取出
通用的 Operator

```
.fromEvent(scrollView, 'scroll');
```

```
// do something change view
```

```
const scroll$ = Observable
```

```
.exhaustMap(() => fetch('url...'))
```

```
.map(event => event.target)
```

```
.subscribe(res => {
```

```
.filter(p => p > 0.9)
```

`.map(hasScrolled)`

scroll$

```
const scrollOverNinetyPercent = Obs =>
```

Obs

`scrollOverNinetyPercent(`
